

## WINTER SHELTER PLAN

We are using our resources to make sure everyone has a safe place to sleep during dangerous conditions this winter. There is no waiting list for single men and women to access shelter while a winter shelter plan is in effect to expand capacity between November and March. That timeframe will be extended until mid-April as needed, based on weather conditions. All the shelters have expanded their capacities to make extra room, and we have opened additional emergency winter beds. And more than 50 winter warming stations have been established across the city. The list is posted at <https://bit.ly/3jqHfYQ>.

Anyone in need of shelter should call the homeless hotline: 1-614-274-7000.
