Why Get Vaccinated?

To Protect Yourself, Your Coworkers, Your Patients, Your Family, and Your Community

- Building defenses against COVID-19 in this facility and in your community is a team effort. And you are a key part of that defense.
- Getting the COVID-19 vaccine adds one more layer of protection for you, your coworkers, patients, and family.

Here are ways you can build people’s confidence in the new COVID-19 vaccines in your facility, your community, and at home:

- Get vaccinated and enroll in the v-safe text messaging program to help CDC monitor vaccine safety.
- Tell others why you are getting vaccinated and encourage them to get vaccinated.
- Learn how to have conversations about COVID-19 vaccine with coworkers, family, and friends.

It all starts with you.

The Moderna vaccine is for people age 18 years and older, should receive 2 doses at least 28 days apart.
The Pfizer vaccine is for people 16 years or older, should receive 2 doses at least 21 days apart.
The Johnson & Johnson vaccine is for people age 18 years and older, and only 1 dose is needed.
